**INFOWAR SCHOOL EMERGENCY ALERT:**

Geoengineering, also known as climate engineering is poisoning our entire planet at a rapid rate and it is being carried out by the N.W.O. they are spraying millions of tones of aluminum nano particles into our skies with other metals and chemicals. This is what is causing severe weather. It is not carbon dioxide (co2) or human activity. It is the N.W.O.

You must learn what Geoengineering is and warn others about it. You must tell your government to stop using it. The government will resist by claiming you are a conspiracy theorist so you must lean the solutions shown in the environment courses and Operation Iceland. Then you can counter their claims and expose their lies and their support for the N.W.O.

At the current rate of geoengineering all species of wildlife will be extinct by 2026.

These are the effects of the geoengineering. These effects are not caused by human made co2. This is what the N.W.O. are doing to you and your family and your pets by using geoengineering.

1. Killing the plant life and forests.
2. Causing frequent and hyperactive forest fires from all the poisoned dead trees. Also, the aluminum spray burns when it is made into nano sized particles making the fires more severe.
3. Polar ice melting from altered ocean currents.
4. Severe droughts.
5. Severe floods.
6. Severe ice storms.
7. Killing farm animals and crops in mass with drought, and floods and freezing weather.
8. Destroying ozone and allowing dangerous UVC rays from the sun to reach the earth surface and kill plants and living creatures on land. UVC rays cause life to die in the oceans due to lack of oxygen.
9. Causing methane to escape from the arctic and under the sea which can cause temperatures to rise high enough to kill everything on earth.
10. Poisoning people and killing them with aluminum nano-particles that cause neurological disease.

## **Environment Course Level 1**

The climate change agenda is a N.W.O. agenda. The climate is always changing and politicians and scientists who are part of the N.W.O. are telling us that we need to stop the climate from changing or else the earth will be destroyed. Exactly what temperature would they like the world to be set to? How do they know that's the best temperature? How do they plan to keep the temperature where they want it? As you work through this course you will see that this climate change agenda is just another piece of the N.W.O. plan to take over the world by setting up their technocracy. We are under a full spectrum attack and controlling energy is necessary to control the world. Let's take a closer look at the N.W.O. climate change agenda. The topics we will look at are: what controls the weather, natural sources and human sources of co2 and the N.W.O. plan to deceive us so they can take over the planet. Then we will look at how the N.W.O. are carrying out their plan using geoengineering which is killing the planet and all life.

### **Keys to Understanding the Environmental Plan of the New World Order**

These are the keys to understanding the environmental plan of the new world order. You must understand these topics to properly and fully understand what is really happening with our weather and who is behind the destruction of our planet and most importantly, how to stop it. Those topics and their brief descriptions are found below and they are explained more in the following topics.

1. The most important key is to understand is: there was no climate change problem until the new world order created the problem by using geoengineering and we have the solutions to end that problem.
  - a. The solutions to ending the climate problems on earth are independent of politics and religion and they will work no matter where you are or who you are.
  - b. The solutions to ending the climate problems on earth are available but they are being blocked by the N.W.O. so that they can force us to accept their plan to control the earth through energy use reduction.
  - c. To stop the climate problems created by the N.W.O. we need to stop them from carrying out their climate engineering program (also called geoengineering program).
  - d. Their lie of climate change caused by human output of co2 is just a lie.
  - e. Even though human contributions of co2 will not cause a climate disaster we still have the ability to lower human co2 emissions but the N.W.O. is not interested in those technologies. If we reveal those technologies it will destroy their lie. Operation Iceland at Infowar School has more information on those technologies.

2. It is geoengineering that is destroying our planet not human activity or human co2 output.
  - a. Geoengineering, also called climate engineering, is a massive program being carried out by the N.W.O. to spray aluminum nano particles and other metals into our atmosphere. They are also using many antenna arrays positioned around the earth to beam EMF waves into the nano particles to control the weather.
  - b. It is geoengineering not co2 that is the cause of the unnatural weather and the destruction of our planet.
3. The purpose of the environmental plan of the N.W.O.
  - a. The environmental plan of the N.W.O. is a very large and complex plan but it is only a part of their overall strategy to take over the world.
  - b. The purpose of their environmental plan is to control energy and land and to reduce population. Energy and land control are necessary for their technocracy to be successful.
  - c. Co2 has been chosen by the N.W.O. to be used in their plan because if they can make us believe that co2 is killing us, but it's not, then they can stop us from using energy and from farming or any other productive industry.
4. the weather is controlled by cosmic rays and the sun
  - a. Cosmic rays and the sun work together to produce clouds or clear skies. This is what controls the weather. Other factors are affected by the clear skies or the clouds but those factors do not control the weather because they have no effect on the cosmic rays or the sun activity.
5. Carbon dioxide is part of the lifecycle of the earth and it is not a danger.
  - a. Co2 does not control the weather and is not a threat to humans. It has a small effect on the weather that is a good effect and there are many other real threats that we should be concerned about instead of co2.
  - b. Co2 is one of the smallest amounts of greenhouse gas in the atmosphere.
  - c. There have been times in the earth's 6000 year history when co2 has been much higher and there was no disaster.
  - d. The N.W.O. lies and tells us that co2 rises and that causes the temperature to rise. Scientists have found that Co2 levels rise hundreds of years after temperatures rise so we are being told the opposite of what has happened.
6. the N.W.O. can't refute science that proves they are lying
  - a. The N.W.O. has to rely on personal attacks against scientists by using the media and other members of the N.W.O. to try to make the good scientists look crazy.
  - b. The N.W.O. controls the world's financial systems, education systems and the UN so they will not fund any scientists that oppose their plan.
  - c. The N.W.O. scientists who follow the plan have to rely on deceptions to try to convince you that co2 is a danger to you.
  - d. They rely on 'consensus' which in this case is mob rule. But there are tens of thousands of scientists that don't agree with their claim that co2 is destroying the earth so there is no consensus but you don't hear about that because the N.W.O. controls so much of the media.

7. the organizations used by the N.W.O. to carry out their environmental plan
  - a. The United Nations and the IPCC (The Intergovernmental Panel on Climate Change).
  - b. The Club of Rome
  - c. NATO
  - d. Many other scientists and media and smaller local organizations and activists around the world are part of the plan and many of them don't even realize they are helping the N.W.O.
  - e. Agenda 21 is also part of their climate plan.
8. Earths historical timeline has been altered to make their environmental plan work.
  - a. The earth is 6000 years old and that has been proven factual. You need to study the religion and evolution courses at Infowar School to understand the proof. It is not complicated to understand. Even if you decide not to study those topics you will still be able to understand how to stop the N.W.O. climate takeover plan.
  - b. The N.W.O. has created the theory of evolution for at least two reasons. It allows the earth's timeline to be falsely extended into billions of years and it allowed communism to be created. Communism is also a major and important part of the overall N.W.O. plan. This is confirmed by a former secret society member named Roger Morneau who was trained by one of the N.W.O. high priests.

### **Cosmic Rays and the Sun Control the Weather**

The weather is controlled by cosmic rays from outer space that hit the earth. These cosmic rays shine through the sky and cause clouds to form. When the sun is active with sun spots there is a lot of radiation that is released from the sun called solar flares. These flares travel through space and block cosmic rays from hitting the earth. When the cosmic rays are blocked by the sun we don't have clouds and the weather is sunny and warmer. When the sun spot activity is low the cosmic rays enter our skies and it gets cloudy so it gets cooler. It is the cosmic rays and the sun that control our weather and humans can't control the sun or the cosmic rays so we are not in control. However, as we see from geoengineering we can only destroy the weather by attempting to control it.

The above two pictures show cosmic rays and how they are blocked by solar flares.

This is a photo of solar flares being emitted from the sun.

<https://www.youtube.com/watch?v=ANMTPF1blpQ>

You can watch the documentary: [Svensmark: The Cloud Mystery](#) to learn how cosmic rays and the sun control earth's weather.

## **The Lifecycle Includes Carbon**

Carbon is everywhere. Have you heard of carbon based life? That's because carbon is the basis for life and you would die without it. It is part of the lifecycle. Mammals breathe in oxygen and breathe out co2. Plants breathe in co2 and breathe out oxygen. If you can control carbon output you can control life on earth and that is what the N.W.O. wants to do. Control life on earth. They would like to control your breathing but that is suspicious. The way they control you through carbon is to control our energy use and the land you use.

[https://www.youtube.com/watch?v=jODIYw\\_5A40](https://www.youtube.com/watch?v=jODIYw_5A40)

[What if higher CO2 concentrations are actually good for plant growth?](https://www.youtube.com/watch?v=jODIYw_5A40)

*Youtube Channel: Peter James*

In this video you can see that co2 concentrations over 1000 parts per million cause plants to grow much better than lower levels of co2.

[Watch the video here.](https://www.youtube.com/watch?v=jODIYw_5A40)

## **The N.W.O. Admit Their Plan Is To Use Climate Change Against the Human Race to Control You**

How does the N.W.O. control us through our energy? With extremely high prices and energy shortages they cause by turning off our energy. If you can't pay for or produce energy you can't stay warm or cook food or produce goods and services and society collapses. Then the N.W.O. comes in and tells us that if we follow their plan of control we can have just enough energy to keep a small part of the population alive. They want to depopulate the earth but remember, the population crisis they claim is happening is also not true. They are murderous people who have no regard for you or your family or your pets.

The N.W.O. justify their shutting down of energy and making the prices unaffordable by telling us that the co2 created by using energy is heating up the planet. It is first important to understand that this is a lie and it is part of the N.W.O. plan. Lets look at which one of their organizations is in charge of this part of their plan and how they admit it is their lie.

The N.W.O. is divided into many groups working together on different areas. One group is called the Club of Rome. This is the group that lies about global warming or climate change being caused by carbon dioxide (co2). First we will look at who the Club of Rome are and then their admission of what they are doing.

Who are the Club of Rome?

[https://en.wikipedia.org/wiki/Club\\_of\\_Rome](https://en.wikipedia.org/wiki/Club_of_Rome)

### Club of Rome

*Wikipedia:*

*19 April 2021*

Founded in 1968 at Accademia dei Lincei in Rome, Italy, the Club of Rome consists of current and former heads of state, UN bureaucrats, high-level politicians and government officials, diplomats, scientists, economists, and business leaders from around the globe.

### The Conspirators Heirarchy: The Committee Of 300

*Dr. John Coleman.*

*Page 15*

It came as a revelation to them that the Club of Rome and its financiers under the title of the German Marshall Fund were two highly-organized conspiratorial bodies operating under cover of the North Atlantic Treaty Organization (NATO) and that the majority of Club of Rome executives were drawn from NATO.

What the Club of Rome are doing?

They admit to creating the lie that co2 is controlling the weather and is dangerous. Co2 is part of the lifecycle of this planet. Increasing it will not harm the planet.

### The First Global Revolution A Report By The Council Of The Club Of Rome

*Alexander King and Bertrand Schneider.*

*Page 75.*

In searching for a common enemy against whom we can unite, **we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like, would fit the bill.** In their totality and their interactions these phenomena do constitute a common threat which must be confronted by everyone together. But in designating these dangers as the enemy, we fall into the trap, which we have already warned readers about, namely **mistaking symptoms for causes.** All these dangers are caused by human intervention in natural processes, and it is only through **changed attitudes and behaviour** that they can be overcome. The real **enemy then is humanity** itself.

They are saying that they decided to use threats of global warming, famine and water shortages to make us think that we have to stop using certain types of energy. They are saying the human race is the enemy of itself and of the earth, therefore the human race must be destroyed. This is how they make us kill ourselves so they have only a small population left to control. They even point out that they want people to fall into the trap of 'mistaking symptoms for causes' but they use creative language to make it easier for them to mislead you if you try to expose them. Their actions prove they are the ones destroying our world as you can see by the effects of geoengineering.

Notice also how they say attitudes and behaviors have to be changed and that is exactly what is happening with UNESCO in our school systems by forcing agenda 21 and sustainable development onto students. Anything the N.W.O. does not want they call unsustainable. You can see more about that topic in the Education Course at Infowar School.

[The Great Global Warming Swindle - Full Documentary HD](#)

*producer Martin Durkin*

This documentary shows how the earth has had warmer periods in its history and also periods of much higher co2 in the atmosphere and nothing bad has happened.

[click here to watch The Great Global Warming Swindle.](#)

The following picture shows how the temperatures fell as the co2 increased from human activity during the Economic Boon after World War 2.

In this video listed below you can see people signing a petition to ban water. People are easily tricked if they are not educated. That is why one of the goals of UNESCO is to make people less intelligent. The chemical name for water is dihydrogen monoxide and its symbol is H<sub>2</sub>O. People are familiar with the name water and the name H<sub>2</sub>O. The symbol means two hydrogen atoms which is dihydrogen and one oxygen atom which is monoxide. The name dihydrogen monoxide is not the common name for water but it is the name for water.

## **Carbon Dioxide (Co2) Does Not Control the Weather**

Human made Carbon dioxide does not control the weather on earth. Cosmic rays and solar activity control the weather on earth. The following quote from a study by Dr. Lindzen shows how an increase in co2 does not account for even 20% of the changes in climate caused by natural cloud cover. Co2 causes a very very small change in the temperature of the earth and it's not a threat. Geoengineering is a threat that is killing people, plants and animals all over earth and we must stop it.

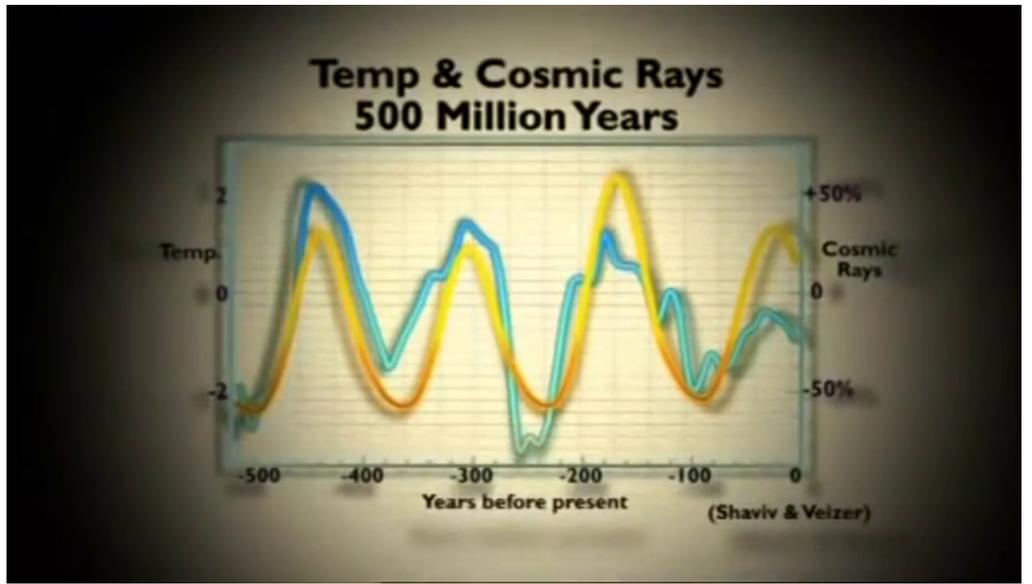

<https://notrickszone.com/2020/06/15/mits-dr-lindzen-pokes-fun-at-the-naive-well-funded-scientific-reasoning-that-1-factor-co2-controls-climate/>

[MIT's Dr. Lindzen Pokes Fun At The 'Naïve', Well-Funded 'Scientific Reasoning' That 1 Factor – CO2 – Controls Climate](#)

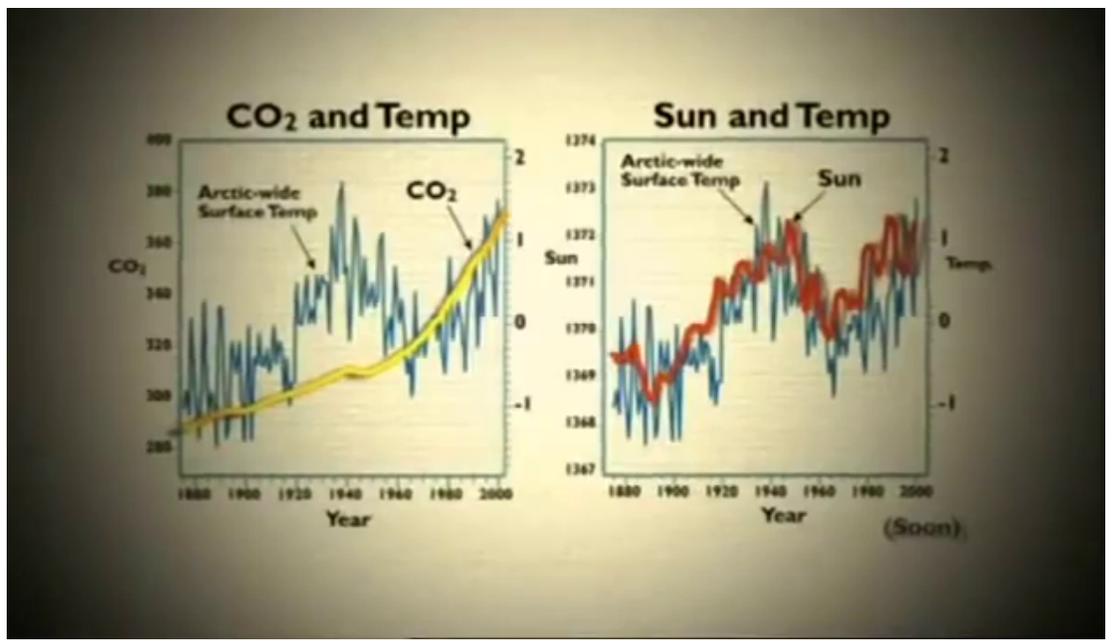

Doubling the atmospheric CO2 concentration from 280 ppm to 560 ppm results in just a 1-2% perturbation to the Earth's 240 W/m<sup>2</sup> energy budget. This doubled-CO2 effect has less than 1/5th of the impact that the net cloud effect has. And yet we are asked to accept the "implausible" claim that change in one variable, CO2, is predominately responsible for altering global temperatures.

Carbon dioxide (co2) has never controlled temperature in the history of earth and it never will. Co2 is a greenhouse gas that traps some of the sun's rays and causes the temperature to rise but it will never cause it to rise to a dangerous level. There are several greenhouse gases and they are all necessary for our survival. Co2 is point zero five four percent (0.054) of the earth's atmosphere and the amount contributed by all human activities is a small part of that. There are other huge sources of co2 like volcanoes, animals, rotting vegetation, and bacteria but the ocean by far is the biggest emitter of co2. These other sources easily outnumber the human contribution and cannot be controlled but there is nothing to worry about because co2 does not control earth's temperature. There have been times in earth's history when there were three times and ten times as much co2 in the atmosphere and the world didn't burn up in a ball of flames. Ninety five percent of greenhouse gas is water vapor and gases other than co2 that are beyond our control and we need them or else we could not survive on earth because we would freeze to death.

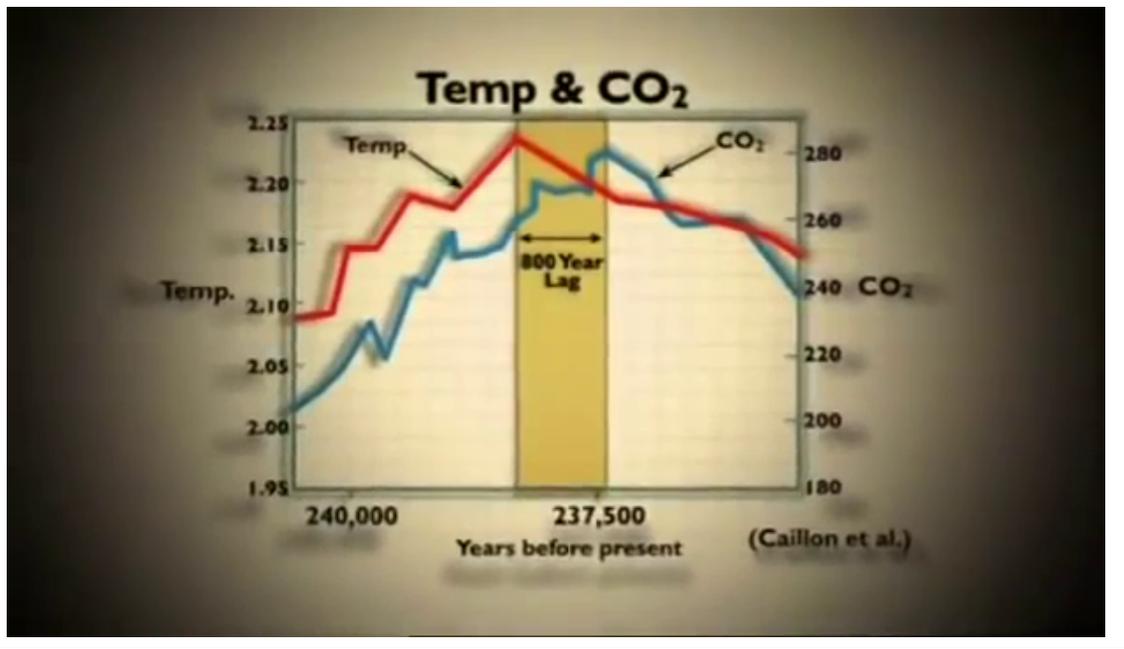

The truth is that on average carbon dioxide rises 800 years after the temperature rises according to the ice core samples. That is proof that the N.W.O. are lying. If the co2 rises hundreds of years after temperature change, then co2 does not control the earth's temperature. Co2 is irrelevant in controlling our weather. Co2 only forms a small part of the greenhouse effect that happens after the weather changes.

From this graph you can see how cosmic rays and temperature correspond to each other.

These two graphs show how co2 and temperature do not correspond and sun activity and temperature do correspond.

This graph shows how co2 rises after temperature rises. Co2 cannot control the weather if it rises after the weather changes.

### **Carbon Dioxide Is Insulation Not The Furnace That Heats The Earth**

Have you ever noticed that we have insulation in our houses? Did you also notice that there is a furnace? Why don't you turn your furnace off this winter and just add more insulation and see what happens. Bad idea? Co2 is just insulation for the earth and you have no control over the furnace which are the cosmic rays and the sun and the clouds. The N.W.O. will argue that too much insulation will cause us to overheat because we can't control the furnace. So how much co2 insulation is there? It's a tiny amount.

As we saw above, carbon dioxide only makes up 0.05 percent of the earth's atmosphere and humans contribute less than ten percent of that tiny amount. The other 90 percent or more we have no control over because it comes from the oceans and volcanoes and dying vegetation and bacteria and animals. All of those sources we have no control over. And they never tell you that the actual increase in temperature associated with an increase in co2 is very very small and not a threat. The real threat is geoengineering being carried out by the N.W.O.

### **Controlling Science with Censorship and Defunding and the Media**

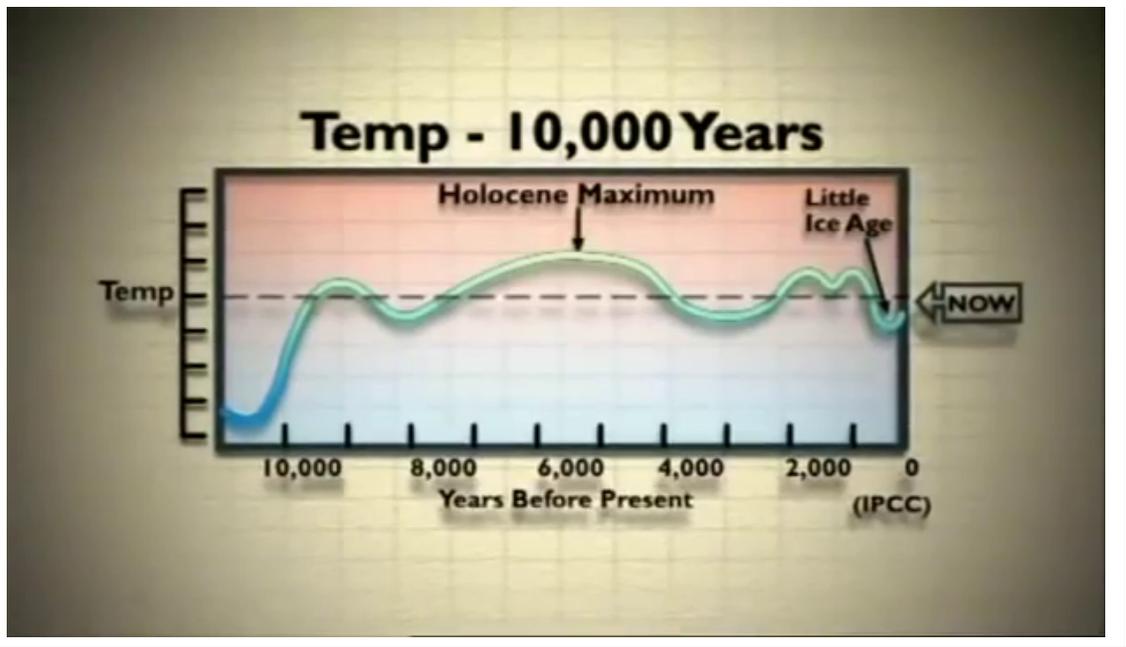

There are many scientists that know the climate change agenda is a political plan that is not based on science but the N.W.O. has set up their control grid long ago so they can stop good scientists from resisting them with any great effect. That is why the N.W.O. took over the financial systems and set up the world government of the United Nations first.

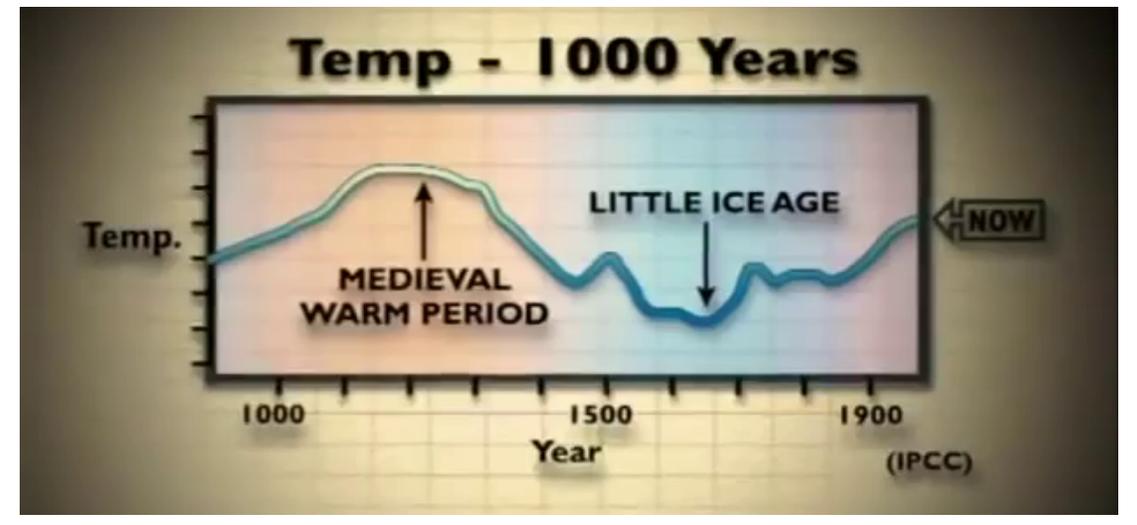

They also took over most of the media. Now the N.W.O. can deny funding to any scientist who speaks out against them or use their huge media influence to attack those scientists and make the public think they are crazy conspiracy theorists. They also use their United Nations to look as if they are 'authoritative' but they are mostly just a bunch of people who support the N.W.O. and in many cases are not even as smart as the scientists who reveal the lies of the climate change agenda.

### Earth Already Had Higher Temperatures

Earth has already had higher temperatures during the mediaeval warm period and the Holocene warm period and there was not planet wide destruction. There was even a short and mild ice age. All of this happened before the industrial revolution without humans producing co2.

The following two graphs show the higher temperatures from the past in earth's history. The people who made these graphs don't understand that the earth is only 6000 years old so the dates on the graphs are longer than 6000 years. The temperatures are still the same so we can still see that they were much higher than they were now.

<https://www.youtube.com/watch?v=u1rj00BoItw>  
[We have to get rid of the Medieval Warm Period!](#)

*Youtube user: ScootleRoyale*

Video of Dr David Deming's statement to the U.S. Senate Committee on Environment & Public Works on December 6, 2006. Dr Deming reveals that in 1995 a leading scientist emailed him saying "We have to get rid of the Medieval Warm Period". A few years later, Michael Mann and the IPCC did just that by publishing the now throughly discredited hockey stick graph.

### There Is No Over Population

How much space do we need to live? To be able to see what it looks like we can use an example of a well known size of land. Look at Alaska on a map. We can fit the entire population of earth there. This is just an example of size to give you a visual idea compared to the total size of the earth. we could fit the entire world population in that same area if only two people lived in a house that had only one floor and no basement with a backyard if there were ten houses per acre and there would still be space left over. So how is there not enough space on the planet? Over population is a lie told to us by the N.W.O.

663,268 sq mi in Alaska

ac = mi<sup>2</sup> \* 640.00

663268mi<sup>2</sup> x 640 = 424491520 acres

424,491,520 acres x 20 people/acre = 8,489,830,400 people

7,800,000,000 people in the world as of March 2020. All people can fit in an area the size of Alaska. The rest of the world can be used for farming and industries and nature.
